

Square Twist Fold Pattern

Jesse L. Silverberg, Jun-Hee Na, Arthur A. Evans, Bin Liu, Thomas C. Hull,
Chris D. Santangelo, Robert J. Lang, Ryan C. Hayward, and Itai Cohen

Step 1: Cut out along black line

Step 2: Crease all red lines so they form “mountains” that point up off the page

Step 3: Crease all blue lines so they form “valleys” that point down into the page

Step 4: Collapse all creases simultaneously so the square twist folds flat

Step 5: Make snapping motions by pulling on square facets in opposite directions

How does the size of the square twist affect it’s “snappy-ness?”

(see online video tutorial at <http://cohengroup.lassp.cornell.edu>)
